We plan to begin our own small community garden and work with Bev to offer healthy and home grown foods to our neighbors. Watch for additional information in coming newsletters.

You are what you eat eats ... what an interesting concept ... consider that everything we eat or drink comes from some place and we likely do not know how it came to the location from which we purchased it. Did it come by plane or boat or rail or truck?

Who handled it and how careful were they? What is the original source and what manner of treatment(s) were involved all along the way?
